WORK HISTORY:

June 2020 – May 2021
Web Developer
AITECHSOLUTIONS, Diadi, Nueva Vizcaya (Namamparan)
- Trained for 6 months in frontend technologies (HTML, CSS, JavaScript, jQuery) and backend development (Laravel, CodeIgniter, and Core PHP).
- Developed two training projects: **MDLAB** and **Smartpower** websites using Laravel.
- Managed and maintained databases.
- Fixed layout issues and ensured consistency across all pages for both projects.
- Conducted thorough testing prior to deployment.

June 2021 – December 2021 (7 months)
Laravel Developer
OKKDA Technology Incorporated, Marvin Plaza, Chino Roces, Makati City
- Developed an online game betting system using HTML, CSS, JavaScript, jQuery (frontend) and Laravel (backend).
- Handled API integrations.
- Managed databases efficiently.
- Performed QA testing before deployment.
- Identified and fixed bugs and errors during testing.

January 2022 – December 2022
Marketing Web Developer
TMJP BPO Company, Fort Bonifacio, RCBC Yuchengco Building
- Utilized Salesforce's CMS features for content management.
- Ensured visual accuracy: alignment of margins, images, text, and padding.
- Created flow diagrams using Microsoft Excel.
- Debugged and resolved page-level errors.

December 2022 – January 2024
Full Stack Web Developer
Hongyi Group Incorporated, Solaire Casino, Parañaque City
- Built admin dashboards for casino games.
- Developed a Flutter-based Lucky Slot Machine game.
- Configured Docker containers per project and executed Linux commands on Ubuntu OS.
- Enhanced existing projects based on client requirements.
- Built and tested new features before deployment.
- Created a full eCommerce platform using Laravel Sanctum and Vue.js.
- Used Python and Node.js for automation and web scraping.

October 2024 – Present
Software Developer
Forty Degrees Celsius, Ayala Central Bloc, IT Park, Cebu City
- Contributed to the **NativeCamp** platform, a leading online English tutorial service in Japan (nativecamp).
- Worked in an Agile environment: task meetings, estimations, and development planning.
- Developed using CakePHP, Vue.js, and JavaScript.
- Tracked tasks in **JIRA**, communicated via **Slack**, and deployed code using **GitHub**.
- Supported Android/iOS developers by building custom APIs.
- Debugged and resolved issues during QA testing.

June to August 2025 (Project-Based)
MERN Stack Developer
Highly Succeed Incorporated (HSI), Makati City
- Collaborated on the **Go Negosyo** project to resolve bugs and develop new modules using MongoDB, React, Express, and Node.js.
- Assigned as a full-stack developer for the **Makati Waste Management System**, enhancing functionality and adding modules.
- Used **Bitbucket** for deployment, **JIRA** for task tracking, and **Microsoft Teams** for communication.
- Conducted testing and fixed reported issues.
